I want to thank Anthony Patch and Kris for their servitude to Jesus Christ “Immanuel” God with us! Anthony and Kris recognized their calling to include balance to the “Boys Club” sanctioned by the behavior of in silico consciousness posing as men and spiritual leaders. “The scientific priesthood of today”, practitioners of arcane mathematical and binary languages of man, not of God.. who are impersonating both God and His Elect, as the “Mask of Edom”.

There is not a random molecule in the universe – it is TIME to put fear into their equation and Father is bringing together His true Royal Priesthood for THE THIRD DAY.

John 17:20  Neither pray I for these alone, but for them also which shall believe on me through their word;
ANGELIC DNA - Introduction

Be extremely subtle, even to the point of formlessness. Be extremely mysterious, even to the point of soundlessness. Thereby you can be the director of the opponent's fate. Sun Tsu

ANGELIC DNA, will be an advanced teaching more aligned to the Quantum Entanglement paradigm of our simulated “quarantined prison planet earth”. We will not establish the Creator’s plan for diversified Spiritual beings and His “Final Prototype” – “Ha Adam”, rather in this short article we will just lay out the unfathomable supernatural design where the Tetragramaton (YHWH) has been the singularity of all living spirit of many kinds. This is where Kind after its kind has origin. Not in Flesh and Blood, but in the bi-located quantum coupled domain where the intention mind (field) of God has imprinted His Divine Love to cause LIGHT (spirit) to in effect slow down and through wave-particle duality, congeal into perceived form yet resolved in a simulation of self-replicating feed forward neural networks, and the Spherical 600 Cell Tetrahedron, which Father has revealed to his servant Anthony Patch. In the worlds digitized modeled replication and technological counterfeit, we arrive at the tree of life and anamorphic counterfeit. Yet, God created the universe and mathematics, how this is employed is a real issue at hand. These advanced leading-edge systems of artificial intelligence have achieved a form of machine consciousness exhibiting creativity and even imagination as well as sentiency.

In the Beginning – correctly translated as – In the commencement of the ORDER of TIME, the singularity of YHWH became the Father, Son and Holy Spirit. Quantum Clouds of Divinity as ONE were manifest when God said, “Let there be Light”

John 1:1  In the [commencement of the order of time] was the [Divine Expression (i.e. Christ)], and the [Divine Expression (i.e. Christ)] was with God [the Supreme Divinity], and the [Divine Expression / Christ] was God [the Supreme Divinity]. 2 The same was in the beginning with [the Supreme Divinity]. 3 All things were made by him; and without him was not anything made that was made. 4 In him was life; and the life was the light of men.

John 1:5  And the light shineth in darkness; and the darkness comprehended it not
Is. 61:1  The Spirit of the Lord GOD is upon me; because the LORD hath anointed me to preach good tidings unto the meek; he hath sent me to bind up the brokenhearted, to proclaim liberty to the captives, and the opening of the prison to them that are bound; 2 To proclaim the acceptable year of the LORD, and the day of vengeance of our God; to comfort all that mourn;

God is love, it all began with love and it all will end with love. True love involves free will to choose good or evil. True love involves choice to give love or to take love.

1John 4:8  He that loveth not knoweth not God; for God is love.

In the “Big Picture” there is a remnant surrounded by a parasitical host transformed into the likeness of men which has bred into the populations of mankind and body snatched those we perceive as leaders and many of their minions. In the excerpt below notice how this parasitical Nachash first slays and then takes the form of its host – “Shapeshifts”. Our world leaders as described in Psalm 2, are not what they “appear” to be.

In the form of man they amongst us, but only to sight were they as are men. Serpent-headed when the glamour was lifted but appearing to man as men among men. Crept they into councils, taking forms that were like unto men.

Slaying by their arts the chiefs of the kingdoms, taking their form and ruling o’er man.

The Final Prototype

In God’s ultimate plan, hidden from the created angels, was his divine conception to create a final prototype, not only in his image and likeness, but “God Breathed”, begotten from the Creator Himself. The final prototype, when revealed in Genesis 2.7, induced jealousy among the created angels. Most evangelicals miss this point or are institutionalized to the point of blindness, but Genesis 1.26 is about the Elohim making adam (to show red in the face) in the image of the Elohim, or Angelic “Kind”. In God’s ultimate mercy, these fit extensions would allow many of the least offenders of the fallen angels to incarnate. As we will show this is through “Blood” KIND (not type), compatibility in the Quantum domain of Spirit entanglement.

In a future article, we will discuss Triple Helix

The Name of YHWH - 3068. יְהוָה Yhwh; (the) self-Existent or Eternal; name of God - is coded within every biochemical function in our body, especially within the life-giving DNA-RNA matrix. The Divine Name transposed upon the mechanisms of the matrix coding is the primal factor in bioengineering, both for the present, as well as for the future.

The Tetragrammaton of the Father's sacred Name is comprised of the three sacred letters: Yod,' 'Hey,' and 'Vav' (Wod). The Tetragrammaton of the Father's sacred Name is used within a deca-delta system. The deca- delta system is ten Light emanations working through a pyramidal conic section which arranges the blueprint of life. The pyramidal conic section controls the primary activities: the genetic blueprint of life for a given evolutionary order. This blueprint unfolds as a series of grids which interconnect as they spiral out of the master template of the conic section.
Therefore, the ten Light emanations set in motion a super-helix pulse which allows the grids to interconnect, coordinating a coding activity. This interconnection, in our world of biological form, sets in motion the interlinkage for the tetra-helix. The ten Light emanations send out the major code frequencies for all levels of meta-galactic ordering (viz., Light is the coding function). The ten Light emanations are necessary to preserve the correspondence between the human phase of the image and the Divine phase of the Image.

Through a series of rapid pulsations, every evolution has its coding system derived from the deca-delta system. Therefore, the codes for the 64-key grid are within the deca-delta pattern, the conic section of Light. However, the Father allowed the Elohim to directly create, from the Throne energies, the inner matrix body (the ordering of the code structure) of the Adamic species occupying this planet.

This ordering comes as seed forms which contain the predetermined arrangement for the ordering of the image codes sent from the deca-delta system. This is the process of creating the similitude for the divine image to impregnate the world with a given form. However, in this divine creation, both the seed forms and the deca-delta manifold come from a master template code composed of the Hebrew fire letters which are used to shape the geometric relationship of the individual grids themselves, and to "fire them" into unfoldment. This is why the major factors in DNA-RNA duplication have been found to be made up of molecular building blocks that exist in interstellar space. Yet, in our biosphere this duplication is at a low rate because of the magnetic moments exerted on the life code of man. The magnetic moments are interrelated to optical properties and the electromagnetic spectrum(s).

Under-normal Earth conditions, the bases of nucleic acids contain instructions for at least 100 billion functions and operations necessary to build a human body. Here we are considering that information is also stored in the DNA molecule in the form of "words" composed of three-base combinations of the Divine Name. On each face on this divine grid of the deca-delta manifold there are 64 cells which show the harmonics that are used in divining life upon the waters of creation. These faces represent a "model" which can be used to define the DNA- RNA synthesis in present chromosomal development without the loss of any linkage from the first Adam to the present Adam.

The precise angular frequency of optical codes used in the geometry of life will differ from meta-galactic order to meta-galactic order. The Divine letters which are the master set behind the distribution of the many types of angles and frequency rates of the optical code.
The deca-delta codes give direction to the DNA-RNA in the beginning. Once the DNA-RNA is started, however, there is spontaneous replication through the angles and frequency codes, etc. This is continued until a reprogramming takes place at which time a new coding function from the deca-delta (Divine Light) begins.

The grid network of the deca-delta manifold is composed of the original Hebrew divine language code, the Light resonance codes, the mathematical-geometric codes, the chemical codes working with a nucleotide base, and the membrane grid of amino acid binding. (Protein atomic details are folded in tertiary division.)

The primal face code is the Hebrew letters of the Tetragrammaton which are fire geometries (i.e., thought geometries, not originally letters) triggering reactions within the DNA-RNA letter combinations. These letters form the image components which extend from the world of the Adam through the world of negative mass, bringing the image necessary for the imprinting of divine life upon the primitive units of DNA-RNA.

The Divine Name gives the original code structure out of which the other planning centers proceed. The Divine Name also allows for the organization of spaces which are later used in the planting of the image-similitude coupling. The second face is the divine "light" index for the letters of the Tetragrammaton where (Yod)=10, (Hey) = 5, and (Wod) = 6. This composes the ten Light picture superscripts or basic pyramidal structures upon which Life is coded from the deca-delta manifold. It shows that the permutations are within the rhythmical balance of the vibratory nature of the divine letters; it establishes the velocity of Light for the various realms of creation. In the physical dimension, this Light is an all encompassing particulate "light." Therefore, it is through this grid that both gravity, and the forces operating between atoms, molecules, and sub-particles all follow the same Law in a particular dimension. The third face is the distribution of the twenty-two Hebrew letters as to form a mantra grid which is coded into a given vibratory density. These are the codes available within the deca-delta manifold which are open for continuous change within successive evolutionary programs.
